

global research for safety

Our mission statement

We protect humankind and the environment by advancing the safety of technical installations.

Our objective

We strive to be the first choice of customers from the public sector in Germany and abroad who are in need of research, methods, analyses or assessments to enhance the safety of nuclear and non-nuclear installations.

To this end, we aim for the following strategic goals:

- to consolidate and enhance the role of GRS as central expert organisation to the German Federal Government.
- to strengthen the position of GRS as an important research organisation both in Germany and abroad.
- to further expand the role of GRS as an internationally operating Technical Safety Organisation.
- to expand the involvement of GRS in the non-nuclear field.

Our values

To achieve this, we are guided by the following values:

- independence and objectivity
- common public interest
- reliability and responsibility
- alertness
- openness and appreciation
